## MARKET ASSUMED A CALMER ASPECT

Rails Displayed More Stability Than Any Active Group.  
Overnight News Favorable

New York, June 28.—There was a continued calming down of the trading in today's stocks market after a further pronounced contraction in the volume of business. Considerable irregularity attended the early movements, but before mid-day there was a perceptible standing of prices all along the line, but with it came increasing dullness.

Practically all the news over night was favorable. The principal events included the settlement of the prolonged British miners' strike; indefinite postponement by the Mexican Chamber of Deputies when the oil decree scheduled for July 1st was set to go into effect; further favorable news from Washington concerning proposed quick relief measures for the railroads and lastly, but not least, the extension of the Railroad Labor Board's order for the wage reduction to go into effect on July 1st. About the only adverse factor confronting the market was the heavy Governmental taxation levied on bonds today. This, however, was without effect on the money market, as all funds were again freely supplied at 5 per cent, which was again established as the renewal rate.

The rather strained condition of the market, however, early movements suggested incomplete realization of the movements necessary as result of the recent violent shake-down. At the same time it was likewise evident there is still a good deal to do in the conclusion of the leaving out of big accounts seriously impaired by the violence and breadth of the liquidating movement. Quite a number of large accounts which were left open on the opening advance, and the abatement of those offerings apparently from bank sources caused the market to wobble for a time.

Aggressive tactics on the part of the team managers was lacking and the issues remained in a strong foothold. The resistance on the part of the associations, however, was the chief factor which caused the market to remain so firmly entrenched in the near approach of a strike holding, and naturally the stockholders were disposed more to sustain outstanding commitments than to make extensions. The bear element, however, alert to opportunities upon any weak spots as indicated by brief sharp drops instituted against the market.

The general tendency of the market as the day progressed was one distinctly toward dullness. A breathing spell would be welcome by both sides.

In matter of movement the rails displayed more stability than any other group, while one of the industries appears to experience a great deal of difficulty in finding a market. The only fair story opening Mexican Petroleum, I. & S. Rubber and others of an unusual highly speculative character sustained substantial setbacks. Mexican Petroleum subsequently recovered more than half of the lost ground. Other reversals, however, were led by the shipping, tobacco, rubber, steel and aluminum shares, notably Bethlehem Steel and Harvester. The only real weakness, however, was confined to Sears-Roebuck.

**LOCAL TRADING NEAR STANDSTILL**

**Heat and Approaching Triple Holiday Brought Dealings to Low Ebb**

The extreme torrid weather coupled with the close proximity of the long holiday had the effect to reduce dealings in the local stocks to minimum proportions. Price variations, in consequence, were both small and meaningless. Extreme narrowness of the market was exemplified in the advance of more than 50¢ in American Stock, transferred to 54½, which was due on the buying and selling of a few small odd lots. The market remained flat.

The two new aluminum stocks following came to the market yesterday morning. Electric Storage Battery opened 2½, up against 24,054 shares a week ago, 4075 shares a year ago, and 18,375 shares two years ago.

The records of the ports for the day are estimated at 25,000 barrels against 24,054 barrels a week ago, 4075 barrels a year ago, and 18,375 barrels two years ago.

July 1st is the first time in many years these two stocks have commanded the same price. Both return the same income and are on the same dividend basis.

Both, like others, are steadily becoming more popular, there is a strong estate in Philadelphia which has not a little of both shares in the safety deposit boxes. The future movement will make an interesting race.

The Philadelphia Electric issue lost the fractional gains scored yesterday. Philadelphia Rapid Transit was taken off 19½, West Jersey and Seashore advanced to some modest solid bottom at 28.

The coal market was relatively firm for four months and ended Northern Indiana and Ohio, while the market showed additional gains.

July 1st is the first time in many years these two stocks have commanded the same price. Both return the same income and are on the same dividend basis.

The two new aluminum stocks following came to the market yesterday morning. Electric Storage Battery opened 2½, up against 24,054 shares a week ago, 4075 shares a year ago, and 18,375 shares two years ago.
